## Oath of Office Administered to New Student Council.

Last Monday's Mass Meeting was somewhat different from the preceding meetings, inso-much as it was something new. After one or two selections by the M. S. M. orchestra, composed of Messrs. Lyons, Kluge, Scott, Stubbins and Harris, Prof. Dean introduced by J. K. Walsh as "the man who supported anything that had M. S. M. tacked to it," gave a short talk on the Student Council, its necessity, and the benefits of such a body to the school. As usual, Prof. Dean's remarks were greeted with applause, and when he was seated, the orchestra again favored the meeting with popular airs.

Messrs. Clarke and Krause were unavoidably out of town, but the remainder of the new Council, Messrs. Stoner, Doennecke and Scott, in the order named, read aloud the following oath of office, and signed their names:

We, the undersigned, having been duly elected to the 1917-18 Student Council of M. S. M., do hereby bind ourselves to fulfill all the duties of our office, and regardless of all personalities, organization affiliations or outside influences, do hereby declare that we will always act sincerely for the best interests of the student body.

Furthermore, if we are unable to do justice to our obligation, we will voluntarily resign our positions, believing that by so doing we are acting for the good of the School of Mines.

Mr. Walsh then addressed the meeting, and in a brief but earn-

Cotinued on Page Three.

## NOTICE.

### Students, Faculty, and Particularly Alumni.

M. S. M. asks you to contribute something to the flagpole if you have not done so already. Only \$40.00 more is needed, and the campus shall have a 100-foot staff. Don't lay down, but if you can, "kick in."

All returns should be in by May 1st. Show your school spirit—as well as your patriotism.

STUDENT COUNCIL '17.

M. S. M.

## TROWEL CLUB!

The last meeting of M. S. M. Trowel Club for the school year 1916-17 will be held on April 30, 1917. This meeting was advanced so that all Seniors could be present.

Remember the date!!!

APRIL 30, 1917,

Refreshments.

## Resolutions.

We, the students of M. S. M., in Mass Meeting assembled, do hereby offer the following resolution:

Resolved, that whereas, our fellow student, F. A. Krause, is unable to continue his classes this semester because of trouble with his eyes, we tender him our sympathy, and hope that he will rejoin us next semester;

Resolved, furthermore, that this resolution be printed in the Missouri Miner, and a copy sent to Mr. Krause.

J. J. Krebs, ex-'16, left Bisbee, Arizona, for South America, where he will accept a position with the Braden Copper Co.

## Miners 75½, McKendree 41½.

The Miners won their first track meet of the season Saturday, April 21, with McKendree, by the score of 75½ to 41½. The track events were won with ease by our team, and the field events were won by us by a one-point margin. The visitors seemed to excel at field work, and gave our men a hard race for first honors. The day was warm and just the right kind for a fast and snappy meet. The attendance was very good, the stands being practically filled. Only one mishap occurred to mar the day, and it came with the broad jump. Bernreuter, of McKendree, while jumping, spiked his left wrist with his shoe while alighting, severing an artery, and had to be carried from the field to the doctor, who fixed him up. His jump was wonderful, being 21 feet, and was good enough to take first place.

There were four starters in the hundred, in which the veteran Brazil carried off first honors very easily, with Bernreuter second, and Aid third. Time :10 4-5.

The 120-yard hurdles were won by White, the freshman, in 17 2-5. Scruby second, Greer third.

The next treat was the mile, in which "Spud" Murphy, true to his regular style, carried off the laurels in 4:49 2-5. Rawlings second, Niece third.

The 440-yard dash was won by White in :55.3; Taggart second, Wilk third. White showed his stride in this event, and how things should be done.

In the low hurdles Brazil was again returned winner, doing the obstacles in :27.4. Aid second,

Greer third.

White, in the one-half mile, took his third first by running the distance in 2:14 4-5. Rawlings second, Ashlock third.

The last track event in which the visitors competed was the 2 mile. This was without doubt the prettiest thing of the meet. Murphy and Rawlings did seven eighths of the distance in step, and side by side. On the last lap our wild Irishman decided to put on fourth high gear, and left Rawlings far in the rear. Time 11:6 2-5. Rawlings second, Lottman third.

Owing to Berneuter's accident, the relay and 220-yard dash were not participated in by McKendree. These events were run by our men, and good results were returned.

Bruce cleared the bar at 10.1 feet in the pole vault, enough to win, with Scruby second, and Tucker third.

Then McKendree took first honor by Baxter heaving the discus 99.6, which was good for first place. Berneuter second, Dorris third.

Capt. Peterson and Scruby tied for first honors in the high jump, both being able to go 5.6 above the terra firma. Gould was third.

Berneuter of McKendree again showed his class by winning the shot put, being able to catapult it 35.25. Brazil second, Peterson and Baxter splitting for third place.

The javelin throw went to the visitors, Collard throwing the spear 147 feet, which was enough. Weiser showed exceptional ability at this art, as he had never thrown the javelin until four nights before the meet. He took second by hurling it 139 feet, Greer third.

Berneuter made only one jump in the broad, due to the accident. It was good for 21 feet and first place. Aid for the Miners took the middle position with a 20.2 jump. This little fellow will undoubtedly, with some coaching and encouragement,

materialize into a very dangerous man in track circles. Peterson third.

The meet was run off very fast so the McKendree team might catch the afternoon train to St. Louis. The visitors were nice, clean cut athletes, and the Miners bid them Mizpah.

The results at a glance:

100-yard dash: Miners 6, McKendree 3.

120-yard hurdles: Miners 8, McKendree 1.

Mile run: Miners 3, McKendree 3.

440-yard dash: Miners 8, McKendree 1.

220-yard hurdles: Miners 8, McKendree 1.

Half mile run: Miners 6, McKendree 3.

2-mile run: Miners 6, McKendree 3.

Pole vault: Miners 8, McKendree 1.

Discus throw: Miners 1, McKendree 8.

High jump: Miners 8, McKendree 1.

Shot put: Miners 3½, McKendree 5½.

Broad jump: Miners 3, McKendree 6.

Javelin: Miners 3, McKendree 6.

Totals: Mines 75½, McKendree 41½.

Officials: Dennie, referee; Cole, starter; Judges at finish, McRae, Clayton, Mann, Hinsch; field judge, Muilenberg; clerk of course, Ebmeyer.

Attention, Members of the M. S. M. A. A.

The annual election of officers of the Missouri School of Mines Athletic Association will be held at the Mass Meeting Monday, April 30th. You are expected to be there.

### Oath of Office Administered to New Student Council.

Continued from Page One.

est talk outlined the duties of the new Council, urged the student body to stand by their representatives, and pointed out to the faculty members the various ways a governing student organization could assist to cooperate with them in making M. S. M. bigger, broader and better.

At the close of his talk he again appealed to all who had not subscribed to the flag pole to do so immediately, as only \$25 more were needed.

Mass meeting adjourned promptly at 11:45.

### Pannings of the Week.

We won the track meet last Saturday, but that is not all; we found wherein we are lacking. And now the boys are hard at work plugging up the holes in our track team.

Last week Prof. Clayton asked the question: "How is a hydraulic cylinder like a piano wire?" Prof. must have been thinking of a boiler works and an automatic piano.

Dr. Barley in Soph. English: "Distinguish between myself and a mongoose."

Student: "I can not."

The Paleontologists were out digging up a prehistoric grave yard last Wednesday. One of the big finds of the day was what looked like a petrified cork screw, and is named after the original bath tub magnet, Archimedes. On the way home one of the boys fell, and broke his crinoid fossil, but sustained no other injuries.

During this nice spring weather it is fine to get up early and go to school, and great to go home, but awful between times.

The Miner now has a frivolity reporter, so all organizations are asked to notify the Miner previous to giving an "excitement,"

so that the reporter may arrive in time for cake and cream.

Prof. Muilenberg discovered last week that the students of Mineralogy do not as yet entirely comprehend the subject. The Professor shows great keensightedness.

A number of schools are giving credit for farm work. We might get some credit for plowing up dandelions on the campus.

The University of South Dakota is asking for a new flag for its flag pole. We are worse off. We have a flag, but no place to put it.

A Rolla girl, when making a dress, was asked why not make a dress of stars and stripes? "I'm afraid all the Miners would want to embrace the flag," she replied.

No, Genevieve, this is not original.

### LEARN TO SWEAR.

An advertisement by the C. E. department: Become proficient in the manly art of cussing. Lessons given once a week in materials lab.

### SOPHOMORE COLUMN.

Notice how the C. E. Sophomores are getting their necks so sunburned. They evidently don't sleep on their backs.

April 23, 1917, at 11:50 a. m., H. Kamp secured his first I in calculus.

If a truss is in equilibrium and a fly alights upon it, that truss will fail.—Garrett.

Kerr, in calculus: "Haven't I any eyes, Prof.?" We didn't know that Lunk was blind.

All men who want to close up their accounts with Nolte can do so at any time now.

Smiley is a confirmed fusser nowadays. One night it is a weiner roast, and the next night a party. Weiser is not watching him close enough.

The height of nerve is to cut Mechanics, and take a nap on the grass just outside the window.

**"Imp" Appears on Campus.**

A new college funny sheet appeared on the campus last week. It bears the name of "Imp," and from the looks of the outside cover it invites inspection. Upon further inspection into the interior we become more and more interested in this said "Imp."

Editorials, short stories, jokes (both old and new), slams and come-backs, form the bulk of the contents of the paper. There is also a fine assortment of pictures and cartoons running thru out the book. This same "Imp" received favorable mention in many leading Eastern papers, and is well worth our closer scrutiny.

"Imp" is published monthly. Subscription price, \$1.50 per year. Single copies, 15 cents. Give Ben Nichols your subscriptions.

Subscribe for the Miner.

**Chilean Smelter to Handle Bolivian Tin.**

Mining and Scientific Press.

A stock company under the name of Compania Chilena de Fundicion de Estano (Chilean Tin Smelting Co.) has been organized with a paid-up capital of \$243,000 for the purpose of establishing a smelter in the port of Arica, Chile, to treat tin concentrates from Bolivia. The committee of engineers having charge of the installation of this smelter is composed of Guillermo Yunge, Durward Copeland, and Richard Gabler. Tin ingots 99.75 per cent fine will be made. It is said that the plans include the treatment not only of tin concentrate, but of other minerals, and the ultimate installation of a manufacturing plant. The work is being done for the owners of the Llallagua Tin Co., Sr. Gigliotto, manager, Santiago, Chile. The capital is Chilean. The mines are at Llallagua, Bolivia, and form one of the two largest groups of tin mines in that country, the other large one being Patino. Durward Copeland, one of the engineers, is an American, formerly professor of metallurgy at the Missouri School of Mines. He has traveled in Cornwall, China, Straits Settlements, and Bolivia, gathering data. He is now at Arica, Chile. Construction has been started, the Chilean government assisting the company with grants of land and water rights.

**Flag on Wishbone is Latest Fad for Girl of St. Joseph.**

St. Joseph Gazette.

Flying the flag on their wishbones, a number of St. Joseph young women yesterday appeared on the streets of the city, displaying their patriotism most charmingly and attracting an amount of attention that wasn't due altogether to the star spanned banner.

The flag is small and of adhesive paper, and it rises just above the mist of ruffles that

form the V-shaped necks. It goes right against the fair patriot's body—nothing can be said to stand between these young women and the flag, and that's the actual truth.

**Engineers 9, Beanery 7.**

The Beaneaters were engineered, that is, worked on, so to speak, in a little seven-inning session of the national pastime, held out on Dennie's pasture last Saturday afternoon.

It was a pretty pitcher's battle between Slover, of the Engineers, and Eames, of the Bean crew. Slover probably had the better of the argument, due to better support, but "Freddie" wasn't far behind. The champs of Rolla Street (the Beans) started out auspiciously by scoring several runs before the Krause tribe settled down. In the fourth inning, however, with the bases full, Hurd brot in three runs with his two-bagger. This put the Engineers out in front, where they stayed until the end altho the Beanery made a seventh inning rally, and brot their total up to seven.

Batteries: Engineers, Slover and Stubbins; Beanery, Eames and Rodenbaugh. Umpires, Dowd and Leonard.

**The Vacation Program.**

**SENIOR COLUMN.**

One more week and school, outside of a little Senior trip, will be over for most of us. Four long years of grind will soon be completed, and we will be thrown out upon a cruel world—a world of war, munition plants, and engineering corps. Now is the time to decide what you are going to do this summer. If you are patriotic, and believe that your country needs you, enlist in the army or navy, or go to some summer training camp. If you think that the time for drastic action has not come as yet, get a job in a mine, a mill, a smelter, or on a farm. The country must have food and metal—you are really serving your country by such work. Whatever you do, do it in such a manner as to make M. S. M. proud of you.

Several of the Seniors have made applications for commissions as second lieutenants in the engineering corps; others are going to take the training offered by the Government in the summer training camps.

Final quizzes in Electrical Machinery Monday, April 30th, and Wednesday, May 2nd.

"Rat" and "Eb" are now running neck and neck for the young lady's favor. Mary likes "Rat", but she thinks "Eb" is much better looking.

The Married Seniors Chess and Checker Club formally admitted our late bachelor friend from Bellville into its ranks last Tuesday evening.

**FRESHMAN COLUMN.**

Uthoff has been laid up for the past week with an injured foot. We are glad to see him out and around again.

Our train service inspector, Bill Bailey, went to Cuba Sunday morning on business.

Duffy (student, not Prof.) went home Tuesday. He is going to work on a farm.

Some of us might have more luck forging checks than forging steel.

The Freshmen chemists now spend most of their time trying to find some one with a sub like theirs.

## JUNIOR COLUMN.

Bob Smart has turned us down. He has his dope put in the Sophomore Column, as we saw last week.

Look out! Beware! The swindlers are coming again. They are trying to knock off the Junior Class with another hydraulics chart.

Pat Murphy, our old reliable, certainly did his part in that track meet last Saturday. It was pretty running, Pat, old boy.

"Doc" Stoner is a member of the Student Council, and he swears he will stand up for the boys in everything that is right.

Civil Engineer Bardsley was seen out riding with three girls last Sunday. He was certainly enjoying something—either the Ford ride, or something.

Juniors are wondering when "Duck" Dake is going to take his ducklings out for another afternoon swim.

Dake changed his mind about being the hoodoo to the Junior Class last Wednesday, when informed that wrinkling was not an act of humiliation in St. James.

Some of the boys are laying in supplies for the coming law, which the Frisco intends to enforce the first of the month.

Mr. L. H. Goldman was called out of town on business last week. He must have passed another exam. Probably assaying.

Student Bill and Dickerson '20, have had a little agreement between themselves, which cost \$1.00 to break. Bill has been trying to compromise ever since the contract was made. But the Freshman says nothing doing.

Bill Reber has not been seen at church as much as usual the last few weeks. The Pastor has been somewhat worried.

It appears that most of the Juniors are getting into the army, taking a chance to be a commissioned officer. Some of the

Profs. are also inclined.

Some military training has been in practice at M. S. M. The three Juniors, Bardsley, Flanders and Cunningham, "fall in" out on Salem Avenue and march into town most every other night or so. Niece has also applied for a privacy in this company.

Caught in Junior Met. class: Prof. Boots: Elfred, don't use so much green paper on this quiz as I don't like to grade my papers with a shovel.

Some strangers were asking if that was a party of geologists or a pack of chickenologists that just passed thru St. James.

Sherwood has been getting along fine lately. He was the other day down at the depot speaking to some of his old familiar cars.

## NOTICE, SENIORS!

All Seniors please see Goldsmith about your next year's Miner... No Miners will be sent out unless paid for in advance. Price for next year: \$1.50 (domestic.) \$1.75 (foreign.)

## Kappa Alphas 12, Prospectors 3.

Ebmeyer's cohorts went down to their second defeat of the season before the Kappa Alpha fraternity nine.

The Greeks started off with a bang, knocking Baker all over the lot and creating big business for the shoemaker. At the end of the first inning the K. A. bunch were five tallies to the good.

The game then settled down somewhat, and was more of a resemblance of the national pastime. The Prospectors gathered three runs in the third, and seemed to be catching up, but the hard hitting State Street bunch saw them coming, and had the Chief's cohorts tongues hanging out from the unused-to exercise of ball chasing before the first of the fifth was over.

Baker on the mound for the Prospectors was given poor sup-

port, and costly errors at crucial times were greatly responsible for the much one-sided score.

Peterson on the mound for the K. A.'s was backed up with air-tight support whenever in the pinches, and came thru the fray without many bruises. The Fraternity showed the heaviest hitting aggregation which has shown up in the Club-Frat series so far.

Batteries: Prospectors, Baker and Evans; Kappa Alpha, Peterson, Benton and Bohart.

## WAR FACTS.

Kansas City Star.

The United States is the eleventh nation to enter the fight against Germany.

We are the fifteenth nation in the war.

America entered the fight on the last day of the 154th week of the war.

All of our wars have been declared in April, except the War of 1812, which started in June.

This is the seventh war of the United States.

It is nineteen years this month since we declared war upon Spain.

This is the first war in which America and England will fight on the same side.

War followed sixty-four days after Germany's note breaking her pledges to the United States.

The so-called eight "great powers" are now all at war.

This will be our first war against a combination of countries.

The first, third, fourth, fifth, sixth and seventh strongest navies all ranged against Germany. The German navy stands second, and the Austrian eighth.

The United States bring in 112 million people against the Central Empires.

We have averaged one war in every twenty and two-sevenths years.

**THE REASON WHY**

They have a student assistant in English:

1. Identify Shiva, Agassiz, Osiris, Odin, Haeckel, Buddha and Zoroaster.

Shiva—An Egyptian, supposed to have a divine voice; an Egyptian dancer; an orthodox Jewish goddess; the Egyptian god of sacrifice; an Hindoo goddess; one of the great Arabian kings; a Persian goddess; the Queen of the Orient.

Agassiz—A Scottish metallurgist; the son of the god Zoroaster; a German naturalist; a Swiss biologist; a graduate of Yale University; an Egyptian god; a professor at Harvard.

Osiris—A ruler of Egypt; a Greek god; the supreme god of the ancients; a Persian goddess; the god of the Welts and other northern people; the god of gods.

Odin—a Grecian god; one of the chief dieties of the northern tribes of Europe; an Egyptian god; a Persian god; the god of the heavens.

Haeckel—A modern geologist; a great German biologist; a Dutch navigator; a bug on paleontology; a Prussian investigator.

Buddha—A Turkish god; an Ethiopian mummy worshipped by the Buddhish; founder of an Indian religion; an image; an Assyrian god; a Mohammedan god; a Malay prophet; an East Indian ruler; a follower of Allah; the highest of Egyptian gods; a prophet sent to convert the Turks.

Zoroaster—An Egyptian goddess; the god of fire and thunder; the original Persian fire eater; an Egyptian builder of temples; the founder of an Indian religion; the Egyptian god of gods; a Prussian king; a Greek god.

P. B. Shotwell, ex-'17, will take the examination for 2nd Lieutenant in the Officers' Reserve Corps.

Subscribe For The Miner.

**SCHEDULE OF GAMES.****Inter Club-Frat. Series.**

8. Engineers v. Muckers, April 28 (1st game.)

9. Grubstakers v. Pi K. A., April 28 (2nd game.)

10. Bonanza v. Beanery, April 30.

11. Independents v. Corsairs, May 7.

12. Grubstakers v. Kappa Sigma, May 10.

13. Kappa Sigma v. Sigma Nu, (not arranged.)

14. Independents v. Kappa Alpha (not arranged.)

15. Engineers v. Bonanza (not arranged.)

16. Sigma Nu v. Pi K. A. (not arranged.)

17. Prospectors v. Corsairs (not arranged.)

18. Muckers v. Beanery (not arranged.)

(Final games will be arranged after above games are played off.)

All teams must furnish their own ball, which goes to the winning team at conclusion of the game.

All games to be of seven innings.

All week-day games to be played at 4:15 P. M. (sharp.) Saturday double-headers to start at 1:30 P. M.

The same rules as were observed last year will be adhered to.

Non-appearance fifteen minutes from time set for game will mean forfeiture of game.

No umpire baiting allowed.

**Cornell.**

Diplomas will be granted to seniors in good standing, and a leave of absence to the undergraduate members of the ambulance corps who leave for France April 14.

J. J. Doyle, ex-'16, is expected in Rolla the 27th, on his way to Casper, Wyoming, where he has been transferred by the Cosden Oil Co.

**New Books in the Library.**

The following books have recently been added to the Library:

Annual Chemical Directory of the U. S.; Bigelow, Atmospheric Circulation and Radiation; Erwin, The Universe and the Atom; Fay, Microscopic Examination of Steel; Johnson, Rapid methods for the Chemical Analysis of Special Steels; U. S. Commerce Department, Artificial Dyestuffs in the U. S.; Schmidt-Fluegel-Tanger, German-English and English-German Dictionary, in 2 volumes.

Fiction: Drake, The Ocean Sleuth; Hough, Magnificent Adventure (a story of the Lewis and Clarke Expedition); Locke, The Wonderful Year; London, The Little Lady of the Big House; McCall, The Stirrup Latch; Smith, F. H., Enoch Crane; Wilson, Somewhere in Red Gap; Wodehouse, The Little Nugget (by the author of Something New.)

Military Science: For the use of those who plan to take examinations for the Officers' Reserve Corps, and those who are interested in military subjects, the Library, in addition to the various Drill Manuals, has a fairly large collection, among which are the Manual of Military Training, by Maj. J. A. Moss (this was used as a text at the Plattsburg camps, and includes the Infantry Drill manual); the military laws of the U.S.; Engineer Field Manual; Field Service Regulations; U. S. Army Regulations; The Service of Information, by Gen. G. P. Scriven; Divisional Outposts, by Col. W. A. Holbrook (a text at the Army service schools); Technical Equipment of the Signal Corps.

R. L. Massey, ex-'18, will leave Bisbee, Arizona some time in May. He expects to travel on the coast, and finally visit his home in Omaha, from where he will take a run down to Rolla for a short visit.
